

IN THE CLAIMS:

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Previously Presented) A development type paper diaper adapted to be worn on a human body for absorbing and holding excrement, comprising a back sheet, a first absorbent, a leakage preventing sheet allowing no liquid permeation, a second absorbent and a top sheet in the recited order, wherein said first absorbent extends, when worn, from the back side through the crotch to the abdomen side of the user said second absorbent extends, when worn, from the back side to the crotch of the user, said second absorbent leaves said first absorbent from said crotch to said back side thereby to form a pocket for holding the excrement between said first absorbent and said second absorbent, said leakage preventing sheet is arranged to contact in said pocket with said second absorbent, and said top sheet is so conformed to the shape of said pocket as to cover said leakage preventing sheet.

2. (Previously Presented) A development type paper diaper adapted to be worn on a human body for absorbing and holding excrement, comprising a back sheet, a first absorbent, a leakage preventing sheet allowing no liquid permeation, a second absorbent and a top sheet in the recited order, wherein said first absorbent extends, when worn, from the back through the crotch to the abdomen

side of the user, said second absorbent extends, when worn, from the crotch to the abdomen of the user, said second absorbent leaves said first absorbent from said crotch to said abdomen side thereby to form a pocket for holding the excrement between said first absorbent and said second absorbent, said leakage preventing sheet is arranged to contact in said pocket with said second absorbent, and said top sheet is so conformed to the shape of said pocket as to cover said leakage preventing sheet.

3. (Currently Amended) A development type paper diaper adapted to be worn on a human body for absorbing and holding excrement, according to claim 1, further comprising a back sheet, a first absorbent, a leakage preventing sheet allowing no liquid permeation, a second absorbent and a top sheet in the recited order, wherein said first absorbent extends, when worn, from the back side through the crotch to the abdomen side of the user, said second absorbent includes a back side second absorbent extending, when worn, from the back side to the crotch of the user and an abdomen side second absorbent body extending, when worn, from the crotch to the abdomen side of the user, a first of said leakage preventing sheets allowing no liquid permeation is interposed between said first absorbent and said back side second absorbent and a second of said leakage preventing ~~[[sheets]]~~ sheet allowing no liquid permeation ~~[[is]]~~ interposed ~~[[and]]~~ between said first absorbent body and said abdomen side second absorbent body, said back side second absorbent leaves said first absorbent from said crotch to

~~said back side, and wherein~~ said abdomen side second absorbent body leaves said first absorbent body from said crotch to said abdomen side, thereby ~~to form~~ pockets forming a second pocket for holding ~~[[the]]~~ excrement ~~respectively~~ ~~between said first absorbent and said back side second absorbent and between said~~ first absorbent body and said abdomen side second absorbent body, ~~said first and~~ said second leakage preventing ~~sheets are~~ sheet is arranged to contact in said pocket ~~[[with]]~~ ~~said back side second absorbent and said abdomen side second~~ absorbent body, respectively, and ~~said top sheet is so conformed to the respective~~ ~~shape of each of said pockets as to cover said leakage preventing sheets.~~

4. (Previously Presented) A development type paper diaper as set forth in any of claims 1 to 3, wherein an excrement containing gathering is disposed along the opening upper end of said pocket and on said top sheet of said second absorbent.

5. (Previously Presented) A development type paper diaper adapted to be worn on a human body for absorbing and holding excrement, comprising a back sheet, a first absorbent, a second absorbent, a leakage preventing sheet allowing no liquid permeation, a third absorbent and a top sheet in the recited order, wherein said first absorbent extends, when worn, from the back side through the crotch to the abdomen side of the user, said second absorbent and said third absorbent extend, when worn, from the back side to the crotch of the user, said second absorbent leaves said first absorbent from said crotch to said back side

thereby to form a pocket for holding the excrement between said first absorbent and said second absorbent, and said top sheet is conformed to the shape of said pocket.

6. (Previously Presented) A development type paper diaper adapted to be worn on a human body for absorbing and holding excrement, comprising a back sheet, a first absorbent, a second absorbent, a leakage preventing sheet allowing no liquid permeation, a third absorbent and a top sheet in the recited order, wherein said first absorbent extends, when worn, from the back side through the crotch to the abdomen side of the user, said second absorbent and said third absorbent extend, when worn, from the crotch to the abdomen side of the user, said second absorbent leaves said first absorbent from said crotch to said abdomen side thereby to form a pocket for holding the excrement between said first absorbent and said second absorbent, and said top sheet is conformed to the shape of said pocket.

7. (Previously Presented) A development type paper diaper adapted to be worn on a human body for absorbing and holding excrement, comprising a back sheet, a first absorbent, a second absorbent, a leakage preventing sheet allowing no liquid permeation, a third absorbent and a top sheet in the recited order, wherein said first absorbent extends, when worn, from the back side through the crotch to the abdomen side of the user, said second absorbent includes a back side

second absorbent extending, when worn, from the back side to the crotch of the user, and an abdomen side second absorbent extending, when worn, from the back side to the crotch of the user, said third absorbent includes a back side third absorbent extending, when worn, from the back side to the crotch of the user, and an abdomen side third absorbent extending, when worn, from the back side to the crotch of the user a first of said leakage preventing sheets allowing no liquid permeation is interposed between said back side second absorbent and said back side third absorbent and a second of said leakage preventing sheets allowing no liquid permeation is interposed between said abdomen side second absorbent and said abdomen side third absorbent said back side second absorbent leaves said first absorbent from said crotch to said back side, and said abdomen side second absorbent leaves said first absorbent from said crotch to said abdomen side, thereby to form pockets for holding the excrement respectively between said first absorbent and said back side second absorbent and between said first absorbent and said abdomen side second absorbent, and said top sheet is conformed to the respective shape of each of said pockets.

8. (Previously Presented) A development type paper diaper as set forth in any of claims 5 to 7, wherein an excrement containing gathering is disposed along the opening of said pocket and on said top sheet of said second absorbent or said third absorbent.

9. (Previously Presented) A development type paper diaper as set forth in any of claims 1 to 3 and 5 to 7, wherein a cubic leg gathering is disposed along said first absorbent.

10. (Previously Presented) A development type paper diaper as set forth in any of claims 1 to 3 and 5 to 7, wherein said first absorbent has a less amount at a widthwise center than that on two sides in a widthwise direction.
